

BODY EXFOLIATION SERVICES

Beauty experts and dermatologists agree that the secret to healthy, youthful skin is exfoliation, which removes the dead skin cells that cling to the outermost surface and reveals the younger, healthier skin underneath. We understand the importance of skin preparation before and proper nourishment after each exfoliating treatment.

Asian Body Cleansing: Using a coarse towel made specifically for exfoliation, this treatment utilizes no chemicals or other abrasive ingredients to remove dead skin cells. It is extremely popular in Korea and Japan and is the main reason why many Asian women have such youthful, beautiful skin.

Soothing Salt Scrub: This process utilizes salts from around the world that are rich in minerals, ayurvedic oils and natural vitamins to gently smooth away dryness and older skin, restoring a beautiful, healthy glow. The natural texture of the salts remove old, dry skin as the light natural fragrance, minerals and oils soothe the mind, ease stress while moisturizing and nourishing the skin.
